IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER
Monitoring and Reporting Requirements Not Met for Vista Redonda MDWCA Water System

Este informe contiene información importante acerca de su agua potable. Haga que alguien lo traduzca para usted, o hable con alguien que lo entienda.

On March 29, 2018 we became aware that our system recently failed to adequately monitor the results of water testing done in 2014 on our well 4. While the samples were taken, the State analysis failed to produce the results necessary to determine if the well was in compliance with water quality requirements for gross alpha. Although this incident was not an emergency, as our customers, you have a right to know what happened.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. Table 1 list the contaminants and the compliance periods which we did not monitor and therefore cannot be sure of the quality of our drinking water during the compliance periods.

Table 1

Contaminant	Facility	Compliance Period
Gross Alpha	Well #4	3rd QTR 2014
Gross Alpha	Well #4	4th QTR 2014

What should you do?
There is nothing you need to do.

What is being done?
Nothing. This notification satisfies an NMED reporting requirement. The water in well 4 has been deemed by the NMED to be in compliance with all quality standards.
