

**IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER
Monitoring Requirements Not Met for VISTA REDONDA MDWCA Water System**

Este informe contiene información importante acerca de su agua potable. Haga que alguien lo traduzca para usted, o hable con alguien que lo entienda.

Our water system violated drinking water requirements during past years. Even though this was not an emergency, as our customers, you have a right to know what happened and what we are doing to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During 2014 through 2017 we did not monitor for lead and copper and, therefore, cannot be sure of the quality of our drinking water during that time.

What should you do?

There is nothing you need to do at this time.

The table below lists the contaminants we did not properly test for during the last year, how often we are supposed to sample, how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which follow-up samples will be taken.

Contaminants	Required sampling frequency	Number of samples required	Number of samples collected	Date sampling should have been done	Date follow-up samples taken or will be taken
Lead and Copper	Every 3 years	5	0	2014-2016; 2017	

What is being done? [Describe corrective action.]

5 SAMPLES WILL BE TAKEN PRIOR TO 1 SEPT. 2019 THIS WILL RETURN THE SYSTEM TO COMPLIANCE
